

## Productlist 2021

### CONFORM® Mattress Overlay System

The system is used as an overlay on top of the standard bed mattress.

A complete mattress system consists of 4 sections (BMC 4) which are held together by connectorstrips.

Each inflatable mattress section is equipped with 2 valves to enable inflation/deflation from either side of the bed.

The use of a bed sheet on top of the mattress is mandatory. For incontinence people a waterproof cover is recommended use a waterproof cover. In case of the cremes on the patients skin, we also recommend waterproof cover since the natural rubber might soak and get porouse.

Article No.	Code	Details
11503	BMC 2	195x85 cm 2 inflatable mattress sections 2 foam sections with waterproof cover connector strips and pump
11504	BMC 3	195x85 cm 3 inflatable mattress sections 1 foam section with waterproof cover connector strips and pump
